# QUICK WELL

## UNDERSTANDING OF PROJECT PROPOSAL AND SCOPE OF THE PROJECT:

The main aim of this project is to make a website which is helpful to provide the medicines online and to facilitate the doctor's appointment so that we can provide medical facilities for the patients without wasting their time on standing for medicines and waiting for the doctor's call at hospital.

User can see all the medicines available and also the details of it like cost,dosage etc..and they can buy the medicine they want .

Patients who do want to meet the doctor can take appointment online through this website and can meet him when they have time.Patient can take an appointment with any doctor they wish by looking into the doctors profiles provided in the website.Doctor's profile will say the locality and the qualifications of him.So that patient can choose an appropriate doctor.

This website also provides the facility that patient can chat with doctor so that patient need not to meet the doctor for suggestions or doubts regarding his ailment if doctor was familiar with patients problem.

This website also provides the facility that patients can book not only appointment with doctor but also for lab tests.Anyone who wants to use this facility can go through website ,can check the labs available and can book.

Health tips will be posted in this website which are given by medical experts.You can follow this website and keep your health better.

Advertisements will also be seen in this website and the funds given by them will be charited.

## ROLE AND RESPONSIBILITY:

- Every user of this website has to login here to enjoy this facility.
- My role is managing the database of the users i.e, verification of the asked details entered while login to the details given while registration.If the details are matched then user will be permitted to the website.
- User can change his/her password.
- Also my role is to create UI for patients profiles i.e, patients who already used this website will be shown here with his details and for what problem user used this website,medicines he/she ordered,booked lab tests and doctor consulted.

## MINUTES OF OUR LAST PROJECT MEETING:

- We briefly discussed of our project and discussed about the individual contributions .
- We prepared the project proposal.

- We kept some targets like when do we complete.How much we can finish by 1 month ,2 months etc.

## MY TEAMMATES AND THEIR ROLES:

1. *E Likhitha:*
   Role of her is to book an appointment of doctor and also to book lab tests.

2. *E Srishti:*
   She makes the website shopping page i.e, user can know about the medicines and can order them.
